To Whom It May Concern,

I am writing on behalf of my patient, Emma Wirtz, who has been under care of my practice for almost eight years. Emma has been treated for severe allergies caused by atmospheric triggers including the type of tree located in front of her home at 1034 Maryhurst Drive. This allergy has caused her to experience ongoing respiratory issues, such as nasal congestion, sneezing, bloody noses, and difficulty breathing, which have significantly impacted her daily life.

Despite consistent management with allergy medications and the use of a nightly humidifier to alleviate her symptoms, her condition remains challenging due to the proximity of this tree. As her healthcare provider, I am concerned about the continued exposure and its impact on her overall health and well-being.

It is my professional recommendation that steps be taken to remove the tree to prevent further allergic reactions and to improve her quality of life.

Sincerely,

A handwritten signature in black ink, appearing to read "Allison Bell" followed by a stylized monogram or initials.
